

C++ Tutorial Submission Format

1. Tutorial Information

Title: C++ Programming Tutorials:

Author Name:

2. Main Topic Header

Main Topic: C++

3. Introduction

Write a clear paragraph explaining the concept. Use **bold text** for key terms.

4. Topic Importance

Bakit Mahalaga ang ?

List benefits using checkmarks (✓). Include at least 3 points.

- ✓
- ✓
- ✓

5. Concept Explanation

Paano Gumagana ang **?**

Provide a step-by-step explanation using numbered or bulleted lists. Use `backticks` for technical terms.

6. Code Example

Halimbawa ng

Add a complete, runnable C++ code example with Tagalog comments

```
#include <iostream> using namespace std; int main() { // Your code example here return 0;
}
```

7. Code Explanation

Paliwanag ng Code

Explain key parts of the code using bullet points. Format code elements with `backticks`.

- →
- →
- →

8. Practical Application (Optional)

ng

Provide additional examples or variations of the concept

```
// Additional code example if needed
```

9. Expected Output

Expected Output:

Show the expected console output of your code example

```
// Output goes here
```

10. Success Message

Write an encouraging message to show when the code runs successfully

Submit your completed tutorial to doji.adds@gmail.com or post in our [Facebook Group](#).
